Education

Middlesex university
BA in animation & interactive media

A

Softomotive - Senior product designer & front-end developer

2019 - Currently

At Softomotive I'm one of the product designers who's working closely with developers for the core product of the company: WinAutomation. Wireframes, high fidelity mockups and html elements are part of my daily duties in an agile working environment.

B

ContactPigeon - Lead UI designer & front-end developer

2016 - 2019

As a lead designer I am responsible for all phases of the UX process, from concepting and information architecture to wireframing, prototyping and coding. I advise other designers and developers throughout the lifecycle of a project.

C

Ellinopoula - UI designer & front-end developer

2015 - 2016

Teaming up with marketing, I was mainly involved with designing graphic elements, illustrations, new pages and email templates.

D

Sam media - UI designer & front-end developer

2011 - 2015

While at Sam media I built hundreds of successful landing pages (for both web and mobile) and I set up many A/B tests.

E

LR Health & Beauty Systems - Designer & front-end developer

2010

Designed animated banners and presentations which combined video, images and music.

F

Dousis Publications - Graphic & web designer

2008 - 2009

In collaboration with marketing I consistently and successfully designed all the advertorial pages throughout the year in all the magazines.
